At the completion of course, participants should be able to:

nurses and health technicians.

This course is designed for gastroenterologists, gastroenterology fellows, gastroenterology endoscopists, and those interested in the newest endoscopic techniques and technological innovations in the field of gastrointestinal endoscopy that can be incorporated in their clinical practice. Through a series of didactic lectures, hands-on workshops, and small group discussions, participants will become familiar with the various endoscopic tools and practice different therapeutic endoscopy procedures under the direct supervision of our esteemed faculty. This will include stenting of the biliary tree, treating Barrett’s esophagus, performing endoscopic retrograde cholangiography, performing endoscopic ultrasound biopsies, performing endoscopic mucosal resection of the Barrett’s esophagus, and performing endoscopic hemostatic techniques.
